# **Assessment Requirements for MSTFP2011**

## **Perform table-based operations**

**Release: 1**

# Assessment Requirements for MSTFP2011 Perform table-based operations

## Modification History

Release 1. Supersedes and is equivalent to LMTFP2011B Perform table-based operations

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures and safe work practices
- applying relevant standards
- checking work against ticket information and workplace standards
- preparing workstation and work before commencing operations
- applying techniques for at least five (5) table-based operations, according to workplace requirements
- using processes and hand tools associated with table-based operations
- carrying out minor tool maintenance
- applying work health and safety (WHS) practices in work operations, with particular reference to adhesives and use of tools
- applying workplace procedures
- maintaining accurate records.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- characteristics of materials used in product construction
- processes used to prepare or construct components and pieces
- operating procedures for table-based production machines
- quality standards and practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in performing table-based operations for footwear, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
