Assessment Requirements for MSTFP3001 Cut leather by hand

Release: 1

Assessment Requirements for MSTFP3001 Cut leather by hand

Modification History

Release 1. Supersedes and is equivalent to LMTFP3001B Cut leather by hand

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing equipment and materials before commencing operations
- applying techniques at least five (5) times, including over the full range of cutting operations
- identifying faults in equipment and different types of leather
- positioning patterns to allow for identified flaws, nap of suede or other grain or print characteristics of leather
- rectifying redeemable faults
- adhering to the quality requirements of the enterprise
- planning and coordinating complicated cutting operations
- checking work against work specifications and enterprise standards
- applying workplace procedures
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- equipment required for both complicated and uncomplicated leather cutting operations
- cutting board maintenance
- leather types, their qualities and principles of cutting
- leather cutting techniques
- recognition of faults, scars and marks that impact on leather cutting
- use of patterns
- enterprise standards
- quality standards and practices
- workplace procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in cutting leather by hand, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
