Assessment Requirements for MSTFR3006 Undertake specialised footwear repair techniques

Release: 1

Assessment Requirements for MSTFR3006 Undertake specialised footwear repair techniques

Modification History

Release 1. Supersedes and is equivalent to LMTR3006A Undertake specialised footwear repair techniques

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- interpreting repair requirements
- confirming repair procedures and costs with client
- identifying special care and repair requirements of footwear materials and design features, and selecting specialised repair techniques
- repairing footwear using specialised techniques on at least three (3) different specialised footwear items
- finishing footwear according to repair requirements and polishing or cleaning footwear, as necessary, and present to client
- applying interpersonal skills to conduct final inspection and to present completed item to client, to ensure completed work meets client needs and expectations, and workplace quality standards.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment for specialised repair techniques
- a range of footwear materials, including their response to repair techniques
- features of specialised footwear and footwear designs
- footwear materials
- quality practices
- workplace procedures
- recording and reporting practices

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in undertaking specialised footwear repair, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
