Assessment Requirements for MSTHL2002

Perform fellmongering processes

Release: 1

Assessment Requirements for MSTHL2002 Perform fellmongering processes

Modification History

Release 1. Supersedes and is equivalent to LMTHL2002A Perform fellmongering processes

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, industry codes and standards
- applying relevant standards
- identifying and performing woolskin preparation on at least two (2) occasions
- conducting sweating, enzyme, or chemical painting processes in accordance with procedures on at least two (2) occasions
- using machine or manual processes to loosen and pull wool to meet specifications on at least two (2) occasions
- documenting all stages of the process
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- characteristics and hazards of chemicals and other materials used on woolskins or in the process
- preparation procedures and fellmongering procedures
- quality standards and manual handling procedures
- work health and safety (WHS) and environmental aspects of relevant organisation processes
- relevant federal and state or territory legislative or regulatory requirements
- recording and reporting procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator

- have vocational competency in performing fellmongering processes, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
