MSTHL2008 Use drum or vessel to crust hides, skins or leather

Release: 1

MSTHL2008 Use drum or vessel to crust hides, skins or leather

Modification History

Release 1. Supersedes and is equivalent to LMTHL2008A Use drum or vessel to crust hides, skins or leather

Application

This unit of competency covers the skills and knowledge required to perform the range of activities associated with using drums or vessels in the crusting processes for hides, skins or leather conducted in restricted spaces or exposed conditions or controlled or open environments.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within industry codes, standards and defined procedures, under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Leather production

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine job requirements

- 1.1 Follow standard operating procedures (SOPs)
- 1.2 Comply with work health and safety (WHS) requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
- 1.4 Identify job requirements from specifications, job sheets or work instructions

- | | | |
|---|--|--|
| 2 | Prepare and load drum or vessel | <div>2.1 Determine drum or vessel loads and batches by counting, weight, volume or other defined method</div> <div>2.2 Assemble and make ready hides, skins or leathers to be dyed or treated to be loaded into drum or vessel</div> <div>2.3 Use relevant manual handling procedures to load drum or vessel with hides, skins or leather</div> |
| | | |
| 3 | Use drum or vessel to crust hides, skins or leather | <div>3.1 Assess between load service of equipment in accordance with manufacturer and workplace procedures</div> <div>3.2 Assess preparation and filling of drum or vessel</div> <div>3.3 Select and use formulations or additives, as required</div> <div>3.4 Operate and use drum or vessel in accordance with operator instructions and SOPs</div> <div>3.5 Follow schedules for the particular process</div> |
| | | |
| 4 | Monitor drum or vessel process | <div>4.1 Check and monitor drum or vessel use for correct function</div> <div>4.2 Monitor process parameters in terms of temperature, time and chemical values</div> <div>4.3 Recognise, isolate and report any deviations from normal</div> |
| | | |
| 5 | Unload drum or vessel | <div>5.1 Unload hides, skins or leather using correct manual handling techniques, where required</div> <div>5.2 Rack or direct hides, skins or leather to correct area for next process</div> <div>5.3 Control handling of process liquid or effluent in accordance with environmental and workplace procedures</div> |

- | | | | |
|---|-------------------------|-----|---|
| 6 | Maintain records | 6.1 | Maintain workplace documentation, as required |
| | | 6.2 | Complete records in accordance with workplace procedures, as required |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- | | |
|---|--|
| Workplace procedures include one or more of the following: | <ul style="list-style-type: none"> • requirements prescribed by legislation, industry codes and standards, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling • WHS practices |
| Australian Standards include: | <ul style="list-style-type: none"> • the relevant industry or Australian Standards that are current at the time this unit is being undertaken |
| Hides and skins preparation includes one or more of the following: | <ul style="list-style-type: none"> • washing • neutralising • retanning • dyeing • fat liquoring • fixing |

Equipment includes one or more of the following

- electronic monitoring and metering systems
- manual chart recording systems
- basic hand tools
- laboratory testing and sampling equipment

Preparation methods include one or more of the following

- counting
- weight
- volume
- other defined method

WHS practices include:

WHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- PPE
- safe materials handling
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other WHS practices relevant to the job and enterprise

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTHL2008A Use drum or vessel to crust hides, skins or leather

Assessment Requirements for MSTHL2008 Use drum or vessel to crust hides, skins or leather

Modification History

Release 1. Supersedes and is equivalent to LMTHL2008A Use drum or vessel to crust hides, skins or leather

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, industry codes and standards
- determining loads and batches and load drum or vessel
- carrying out between load servicing, filling drum and vessel and adding dyes, formulations and additives
- operating and using drum or vessel and following schedules for a particular process according to operator instructions and SOPs, on at least two (2) occasions
- checking and monitoring correct function and process parameters ensuring product meets specifications
- recognising and isolating deviations from normal in accordance with procedures
- controlling handling of process liquid or effluent in accordance with environmental and workplace procedures
- loading and unloading hides ,skins or leather using relevant manual handling techniques
- maintaining accurate records.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- industry and product processes and equipment
- procedures and requirements for preparation and loading
- characteristics, hazards and applications of dyes, formulations and additives used in crusting process
- monitoring processes and operator instructions
- quality standards and manual handling procedures
- work health and safety (WHS) and environmental aspects of relevant processes, including effluent handling and disposal
- relevant federal and state or territory legislative or regulatory requirements
- recording and reporting procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in using drum or vessel to crust hides, skins or leather, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
