Assessment Requirements for MSTLG2006

Identify materials used in leather goods production

Release: 1

Assessment Requirements for MSTLG2006 Identify materials used in leather goods production

Modification History

Release 1. Supersedes and is equivalent to LMTLG2006A Identify materials used in leather goods production

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices, industry codes and standards
- identifying a range of materials used in leather goods production
- identifying the range of uses of materials for leather goods production and their handling and care requirements
- identifying performance characteristics of at least five (5) different leather and material samples
- identifying common faults, problems and surface defects of materials and how to deal with them
- maintaining accurate records.

Knowledge Evidence

- Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:
- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- handling procedures for materials
- types of materials:
 - types of leather
 - adhesives
 - fabrics
- performance characteristics:
 - size
 - grain
 - nap
 - substance
 - hair follicle patterns of leather
 - stretch

- abrasion
- wearability
- absorbency
- durability
- elasticity
- heat sensitivity
- shrink resistance
- strength
- common faults, problems and defects
- quality standards and practices
- work health and safety (WHS) and environmental aspects of relevant production and assembly processes
- relevant federal and state or territory legislative or regulatory requirements
- recording and reporting procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in identifying materials used in leather goods production, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
