Assessment Requirements for MSTML3001 Make flat patterns from hat blocks

Release: 1

Assessment Requirements for MSTML3001 Make flat patterns from hat blocks

Modification History

Release 1. Supersedes and is equivalent to LMTML3001A Make flat patterns from hat blocks

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- interpreting design sketch or illustration, analysing design information and interpreting specifications to identify component shapes of the millinery item
- determining and preparing suitable blocks to meet design and head size
- marking millinery design lines onto pattern medium according to specifications of millinery design
- using millinery tools and equipment to cut first patterns
- developing mock-up to test patterns using techniques according to workplace procedures
- adjusting patterns, where necessary, to comply with design and size
- finalising at least two (2) patterns and adding cutting instruction, grain line and notches
- checking patterns against quality criteria and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- interpreting design sketch or illustration, analysing design information and interpreting specifications to identify component shapes of the millinery item
- determining and preparing suitable blocks to meet design and head size
- marking millinery design lines onto pattern medium according to specifications of millinery design
- using millinery tools and equipment to cut first patterns
- developing mock-up to test patterns using techniques according to workplace procedures
- adjusting patterns, where necessary, to comply with design and size
- finalising at least two (2) patterns and adding cutting instruction, grain line and notches
- checking patterns against quality criteria and workplace procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in making flat patterns from hat blocks, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
