Assessment Requirements for MSTML4002 Rejuvenate millinery

Release: 1

Assessment Requirements for MSTML4002 Rejuvenate millinery

Modification History

Release 1. Supersedes and is equivalent to LMTML4002A Rejuvenate millinery

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- interpreting rejuvenation requirements
- preparing materials, equipment and headwear for selected rejuvenation procedure
- applying all five (5) rejuvenation techniques
- using effective interpersonal skills to communicate with client
- finishing headwear according to quality standards
- presenting completed item to client
- completing and maintaining details of finished article and client records according to workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- selection of appropriate rejuvenation techniques:
 - cleaning
 - repairing
 - re-styling
 - re-sizing
 - curating
- vintage and style characteristics of headwear
- industry and product processes and equipment for rejuvenating hats
- materials, equipment and headwear for selected rejuvenation
- a range of textiles and materials, including their response to cleaning and manipulation techniques
- styles of hats from a range of eras
- measurements for resizing
- cleaning processes and agents to clean headwear
- repair processes:
 - sewing or stitching
 - patching

- repairing or reattaching brimming
- attaching clips, decorations, straps, bows and buckles
- re-colouring patches
- replacing fabric and attachments
- curating techniques
- resizing techniques:
 - stretching
 - adding inserts
 - replacing or re-sizing elastic, brims or fasteners
 - remodelling
- workplace procedures.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in rejuvenating millinery, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
