Assessment Requirements for MSTTD4001 Produce knitted textile samples

Release: 1

Assessment Requirements for MSTTD4001 Produce knitted textile samples

Modification History

Release 1. Supersedes and is equivalent to LMTTD4001A Produce knitted textile samples

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- checking operational readiness of equipment
- analysing design specifications and interpreting production requirements
- preparing yarn and thread for production
- monitoring production
- recognising and rectifying faults or problems as required
- producing at least two (2) different types of knitted samples according to design specifications
- monitoring own work and conducting quality check of sample outcome
- maintaining accurate records
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- knit modification techniques
- knitting machine techniques
- yarn characteristics
- typical fault conditions
- fault-finding procedures
- types and styles of knitted fabrics
- simple equipment maintenance techniques
- quality practices
- workplace practices
- recording and reporting practices.

Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in producing knitted textile samples, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
