Assessment Requirements for MSTTD4012

Analyse use of colour in textiles

Release: 2

Assessment Requirements for MSTTD4012 Analyse use of colour in textiles

Modification History

Release 2. Supersedes and is equivalent to MSTTD4012 Analyse use of colour in textiles (Release 1).

Pre-requisite unit, MSTGN2011 Identify fibres, fabrics and textiles used in the TCF industry, is **superseded by** MSTGN2013 Identify fibres, fabrics and textiles used in the TCF industry.

Release 1. Supersedes and is equivalent to LMTTD4012A Analyse use of colour in textiles.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- identifying uses of colour in textile designs
- preparing and using colour wheels and colour charts for at least two (2) textile samples
- using appropriate tools and equipment
- collecting and comparing at least ten (10) samples of textile products that demonstrate different visual effects
- using at least three (3) pieces of fabric to colour match all components to complement, such as zip, buttons, threads, linings and other appropriate trims
- documenting colour investigations for future reference
- applying workplace procedures.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- colour wheels and colour charts
- dimensions of colour
- visual or optical effects of colour
- uses of colour in textile designs
- characteristics of different fibres and fabrics
- tools and equipment for experimenting with colour
- workplace procedures
- documentation and record keeping.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in analysing use of colour in textiles, at least to the level being assessed, with relevant industry knowledge and experience.
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required including relevant workplace procedures, product and manufacturing specifications associated with this unit.
