Assessment Requirements for MSTTF3014 Install manufactured textile products

Release: 1

Assessment Requirements for MSTTF3014 Install manufactured textile products

Modification History

Release 1. Unit code, Title and Application changed. Title changed for clarity. Elements and Performance Criteria restructured and simplified. Foundation Skills field populated. Range of Conditions removed with relevant information moved to Knowledge Evidence. Assessment Requirements clarified with generic foundation skills statements moved to appropriate section and duplication with Performance Criteria removed. Specific requirements which limit application removed (e.g. use of bosun's chair). Supersedes and is not equivalent to MSTTF2015 Install products on and off site.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- comply with all safety requirements to install and set manufactured textile products on at least two occasions.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- existence and basic requirements of Australian Standards for products being installed
- safe work practices and procedures for installation of manufactured textile products, including:
 - use of personal protective equipment (PPE)
 - hazard identification and control measures, including electrical and general workplace hazards and means of identifying them
 - considerations and equipment for working at heights
- for the products and associated equipment to be installed:
 - operating principles, including setting and adjustment
 - typical installation problems and their rectification procedures
 - quality standards
 - format of specifications
- the range of hand tools, power tools, measuring devices and other equipment used in the installation process, and their operating principles and appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- typical aspects of the installation process:
 - using tools to drill and prepare locating holes
 - safely lifting or lowering products into position

- using fastenings to attach or anchor product
- fitting pulleys or sheave blocks
- threading or attaching ropes or cables
- fitting stays or other fastenings
- completing quality checks
- cleaning up work area after fitting
- mathematical processes used in the installation and checking processes
- workplace procedures for recording and reporting information.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
 - installation documentation
 - manufactured textile products to be installed and product information
 - installation site
 - tools and equipment required for installation
 - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
