MSTTN2001 Set up and operate a dry laid web forming machine

Release: 1

MSTTN2001 Set up and operate a dry laid web forming machine

Modification History

Release 1. Supersedes and is equivalent to LMTTN2001B Set up and operate a dry laid web forming machine

Application

This unit of competency covers the skills and knowledge required to set up and operate dry laid web forming machines used to manufacture non-woven textiles.

The unit of competency covers the skills needed for initial start-up and product changeovers of dry laid web forming machines, including machine settings, first-off runs, adjustments and instructions to operators.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Technical textiles and non-wovens

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Determine job requirements	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings,

job sheets or work instructions

- | | | | |
|---|---|-----|---|
| 2 | Set up and load dry laid web forming machine | 2.1 | Check specifications to identify requirements for production |
| | | 2.2 | Check raw materials, containers and quantities |
| | | 2.3 | Adjust machine settings to meet product requirements |
| | | 2.4 | Clean area around machine during and on completion of setting and loading |
| | | | |
| 3 | Operate and monitor dry laid web forming machine | 3.1 | Start and stop dry laid web forming machine according to manufacturer instructions and job requirements |
| | | 3.2 | Monitor machine operations to ensure safe and correct operation |
| | | 3.3 | Sort waste and clean machine when required |
| | | 3.4 | Identify, correct and report minor product, process and machine faults, where necessary, to meet specified requirements |
| | | 3.5 | Operate machine according to WHS and workplace practices and report major machine faults |
| | | | |
| 4 | Check quality and complete dry laid web forming operations | 4.1 | Check formed web against quality standards and production requirements |
| | | 4.2 | Identify, rectify or report web faults and non-conformances |
| | | 4.3 | Despatch dry laid web to next manufacturing or packing process |
| | | 4.4 | Clean area to maintain a safe and productive work environment |
| | | 4.5 | Complete production records |

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:	• requirements prescribed by legislation, awards, agreements and conditions of employment • SOPs • work instructions • oral, written and visual communication • quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output • housekeeping • tasks related to environmental protection, waste disposal, pollution control and recycling
Australian Standards include:	• WHS practices • the relevant industry or Australian Standards that are current at the time this unit is being undertaken
Fibres include one or more of the following:	• fibre size: • length 30-80 mm • 1.1-8.0 dtex (diameter) • fibre types: • rayon and other cellulose • nylon • polyester • polypropylene • cotton • wool • glass • bi-component

Dry laid web includes one or more of the following:

- web formed using any of the following techniques:
 - carded web (parallel laid)
 - carded web (cross laid)
 - carded web (random laid)
 - air laid staple fibre web
 - high-loft webs

WHS practices

WHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other WHS practices relevant to the job and enterprise

Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTTN2001B Set up and operate a dry laid web forming machine
