MSTTN2007 Conduct technical textile mechanical finishing processes

Release: 1

MSTTN2007 Conduct technical textile mechanical finishing processes

Modification History

Release 1. Supersedes and is equivalent to LMTTN2007B Conduct technical textile mechanical finishing processes

Application

This unit of competency covers the skills and knowledge to conduct technical textile mechanical finishing processes.

The unit of competency applies to finishing processes used in the production of technical textiles. Processes may include heat setting, scouring, calendering, singeing, impregnation, raising, cropping and compressive shrinkage.

Technical textiles are textile products that have been manufactured for special technical performance and applications. Clothing, carpet or furnishing textile products are generally not regarded as a technical textile unless a specific technical feature beyond what is normally found in clothing, carpet or furnishing has been added. An example would be special fire-retardant clothing.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Technical textiles and non-wovens

Unit Sector

Not applicable

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|----------------------|-----|---|
| 1 | Determine job | 1.1 | Follow standard operating procedures (SOPs) |
|---|----------------------|-----|---|

	requirements	1.2	Comply with work health and safety (WHS) requirements at all times
		1.3	Use appropriate personal protective equipment (PPE) in accordance with SOPs
		1.4	Identify job requirements from specifications, drawings, job sheets or work instructions
2	Prepare for mechanical finishing processes	2.1	Make appropriate checks to ensure that textile fabric or web is ready for mechanical finishing processes
		2.2	Conduct appropriate pre-finishing tests if required
		2.3	Prepare work area according to WHS practices and workplace procedures
		2.4	Prepare and adjust specialised machine according to product finishing specifications
		2.5	Report and record any problems
3	Operate mechanical finishing machines	3.1	Operate mechanical finishing machines and follow WHS practices
		3.2	Check mechanical finishing machines during operation and adjust to ensure optimum performance
		3.3	Identify, report and record any machine or product faults
		3.4	Assess technical textile complies with quality standards and product finishing specifications
4	Despatch completed work	4.1	Check technical textile production against quality standards and job requirements
		4.2	Conduct appropriate tests and sampling, as required
		4.3	Direct technical textile production to next operation
		4.4	Complete work documentation as required

Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Workplace procedures include one or more of the following:

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

Australian Standards include:

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

Mechanical finishing processes include one or more of the following:

- heat setting
- scouring
- calendering
- singeing
- impregnation
- raising
- cropping
- compressive shrinkage

WHS practices

WHS practices must include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- other WHS practices relevant to the job and enterprise

Unit Mapping Information
