Assessment Requirements for MSTTX3009 Operate in a complex textile production environment

Release: 1

Assessment Requirements for MSTTX3009 Operate in a complex textile production environment

Modification History

Release 1. Supersedes and is equivalent to LMTTX3009B Operate in a complex textile production environment

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- identifying main production processes and quality systems across and within departments and own work area, including internal and external suppliers, and internal and external customers
- collecting samples and identifying all main types of raw materials received by the organisation for processing
- preparing a summary diagram or chart to identify production processing stages and departments responsible for work flow through the organisation
- listing key tasks performed in own and at least one (1) other department within the organisation
- detailing the production functions of at least one (1) additional work area, including internal and external suppliers, and internal and external customers
- maintaining responsibility for quality of own work according to workplace procedures in own and additional departments
- working in cooperation with team members from other departments.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- textile production processes used in the organisation
- technical processes and key tasks of two or more departments
- structure of organisation
- internal and external suppliers
- internal and external customers
- raw materials
- product flow
- quality standards and practices

- workplace organisation and procedures
- recording and reporting practices.

Assessment Conditions

- Assessors must:
 - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
 - have vocational competency in operating in a complex textile production environment, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
