MTMP2116B Process offal

Release: 1

MTMP2116B Process offal

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to process offal in an abattoir situation.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers processing offal in an abattoir.
--------------------------------	---

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMPSR203A	Sharpen knives

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Process offal	1.1. Steps involved in processing four types of offal are identified and described. 1.2. Offal is inspected and defects are identified including disease and contamination. 1.3. Offal is trimmed of connective tissue and other material according to workplace and Occupational Health and Safety (OH&S) requirements. 1.4. Trim is placed in the appropriate bin or chute according to workplace requirements. 1.5. Types and sources of contamination are identified.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify contamination and defects and take corrective action
- identify defects in offal including disease (including Ovine Johne's Disease (OJD)), parasite damage and contamination
- work efficiently in teams and individually
- apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- wash offal (where required) according to workplace requirements

Required knowledge

Knowledge of:

- hygiene and sanitation requirements related to processing offal
- OH&S requirements related to processing offal
- relevant regulatory requirements
- sources of contamination and cross-contamination

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal chain speed.

Competency must be demonstrated in processing a minimum of four (4) types of offal.

Context of, and specific resources for assessment

Assessment must be conducted in a registered operating meat processing plant.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and

EVIDENCE GUIDE	
	literacy demands of the assessment task should not be higher than those of the work role.
Guidance information for assessment	A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
<i>Offal</i> may include:	• brains • head meat • kidney • lips • liver • oesophagus • pancreas • pituitary glands • pizzles • rectum • runners • sweet runners • tail • tendons • testicles • tongue root and tongue • trachea • uterus • weasand.
<i>Contaminants</i> may include:	• abscess • blood disease (such as OJD, Bovine Johne's Disease (BJD), etc)

RANGE STATEMENT	
	• ingesta • tumour.
Workplace requirements may include:	• enterprise-specific requirements • OH&S requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
OH&S requirements may include:	• enterprise OH&S policies, procedures and programs • OH&S legal requirements • Personal Protective Equipment (PPE) which may include: • coats and aprons • ear plugs or muffs • eye and facial protection • head-wear • lifting assistance • mesh aprons • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice etc.
Regulatory requirements may include:	• Export Control Act • federal, state and territory regulations regarding meat processing • hygiene and sanitation requirements • relevant Australian Standards • relevant regulations • requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption • requirements set out in ASEN 1244:2003 Australian Standard for Animal Tissues and

RANGE STATEMENT

	their Derivatives Utilised in the Manufacture of Medical Devices - Controls on Sourcing, Collection and Handling.
