MTMP2143C Separate offal

Release: 1

MTMP2143C Separate offal

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to separate offal into edible and inedible types (including pet meat). It also involves the identification of contamination and defects.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to slaughter floor and game processing plant operations.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMPSR203A	Sharpen knives (where applicable)

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify offal	1.1. Different types of offal , including edible and inedible offal, are identified according to workplace requirements .
2. Separate offal into edible and inedible offal	2.1. Offal is separated and sorted into edible and inedible offal according to workplace requirements. 2.2. Offal that is fit for human consumption is identified and passed to appropriate area for processing according to workplace requirements. 2.3. Gall bladder is separated from liver. 2.4. Offal that may have sustained damage is washed, where applicable. 2.5. Condemned offal is identified according to inspection brands or marking. 2.6. Offal is placed in chutes or bins according to workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify the various organs processed on the viscera table
- separate offal to hygiene and sanitation, workplace, Quality Assurance (QA) and Occupational Health and Safety (**OH&S**) **requirements**
- identify condemnation marks on offal
- handle offal to avoid bile, ingesta, excreta or content contamination
- dispose of inedible offal in appropriate bins or chutes
- work effectively as an individual and as part of a team
- apply relevant **regulatory requirements**
- take action to improve own work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology

Required knowledge

Knowledge of:

REQUIRED SKILLS AND KNOWLEDGE

- hygiene and sanitation, workplace, QA and OH&S requirements associated with separating offal on the slaughter floor
- impact of contamination of edible offal on further processing
- importance of accurate separation of offal on the viscera table
- relevant regulatory requirements

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at normal chain speed.

Context of, and specific resources for assessment

Assessment must occur in the workplace under normal production conditions.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this Unit of Competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Offal may include:

- brain
- cheeks
- diaphragm, skirts and flares
- glands
- heart
- kidneys
- liver
- lungs
- penis
- small intestines
- spleen
- stomach(s)
- tail
- tendons
- testicles
- tongue
- tripe
- weasand
- or any other tissue recovered for human consumption or medical uses.

Workplace requirements may include:

- enterprise-specific requirements
- OH&S requirements
- QA requirements
- Standard Operating Procedures (SOPs)

RANGE STATEMENT	
	- the ability to perform the task to production requirements - work instructions.
OH&S requirements may include:	- enterprise OH&S policies, procedures and programs - OH&S legal requirements - Personal Protective Equipment (PPE) which may include: - coats and aprons - ear plugs or muffs - eye and facial protection - head-wear - lifting assistance - mesh aprons - protective boot covers - protective hand and arm covering - protective head and hair covering - uniforms - waterproof clothing - work, safety or waterproof footwear - requirements set out in standards and codes of practice.
Regulatory requirements may include:	- Export Control Act - hygiene and sanitation requirements - relevant regulations - requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption.
