MTMP3037C Eviscerate animal carcass

Release: 1

MTMP3037C Eviscerate animal carcase

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit covers the skills and knowledge required to eviscerate an animal carcase.
------------------------	---

Application of the Unit

Application of the unit	This unit is applicable to workers eviscerating carcasses in a registered meat processing plant.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		
	MTMPSR203A	Sharpen knives

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Remove <i>internal organs and tissues</i>	1.1. Organs and tissues to be removed are identified. 1.2. Pluck is removed without contaminating the carcase and in accordance with work instructions. 1.3. Digestive tract is removed in accordance with work instructions. 1.4. Organs are presented for inspection according to regulatory requirements. 1.5. Occupational Health and Safety (OH&S) requirements are identified and complied with. 1.6. Sources of contamination and cross-contamination are identified. 1.7. Corrective action is taken in the event of contamination in line with workplace requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- open carcase and remove internal organs to workplace and regulatory requirements
- use secure **sealing procedures** to avoid fouling the carcase (where this forms part of work instruction)
- apply relevant OH&S requirements
- comply with OH&S requirements
- apply relevant **communication skills**
- take action to improve work performance as a result of self-evaluation, feedback from others, or in response to changed work practices or technology
- work with team members to ensure offal is presented correctly for inspection

Required knowledge

Knowledge of:

- procedures for safe and hygienic use of knife
- work instructions, including corrective action requirements
- relevant OH&S requirements

REQUIRED SKILLS AND KNOWLEDGE

- potential risks of contamination and cross-contamination of the carcase and the required steps for corrective action
- relevant anatomy of the species, breed, sex and age of the animal being processed

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

The meat industry has specific and clear requirements for evidence. A minimum of three forms of evidence is required to demonstrate competency in the meat industry. This is specifically designed to provide evidence that covers the demonstration in the workplace of all aspects of competency over time.

These requirements are in addition to the requirements for valid, current, authentic and sufficient evidence.

Three forms of evidence means three different kinds of evidence - not three pieces of the same kind. In practice it will mean that most of the unit is covered twice. This increases the legitimacy of the evidence.

All assessment must be conducted against Australian meat industry standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Competency must be demonstrated at the normal rate of production.

Context of, and specific resources for assessment

Assessment must be conducted in a registered meat processing establishment.

Method of assessment

Recommended methods of assessment include:

- quiz of underpinning knowledge
- workplace demonstration
- workplace referee or third-party report of performance over time.

Assessment practices should take into account any relevant language or cultural issues related to Aboriginality or Torres Strait Islander, gender, or language backgrounds other than English. Language and literacy demands of the assessment task should not be higher than those of the work role.

EVIDENCE GUIDE**Guidance information for assessment**

A current list of resources for this unit of competency is available from MINTRAC www.mintrac.com.au or telephone 1800 817 462.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Internal organs and tissues may be those associated with:

- glands
- nervous system
- renal system
- reproductive and digestive systems
- respiratory and circulatory systems.

Regulatory requirements may include:

- Export Control Act
- hygiene and sanitation requirements
- relevant Australian Standards
- relevant regulations
- requirements set out in AS 4696:2007 Australian Standard for Hygienic Production and Transportation of Meat and Meat Products for Human Consumption
- federal, state and territory regulations regarding meat processing.

OH&S requirements may include:

- enterprise OH&S policies, procedures and programs
- OH&S legal requirements
- Personal Protective Equipment (PPE) which may include:
 - coats and aprons
 - ear plugs or muffs
 - eye and facial protection
 - head-wear

RANGE STATEMENT	
	• lifting assistance • protective boot covers • protective hand and arm covering • protective head and hair covering • uniforms • waterproof clothing • work, safety or waterproof footwear • requirements set out in standards and codes of practice.
Workplace requirements may include:	• enterprise-specific requirements • OH&S requirements • hygiene and sanitation requirements • Quality Assurance (QA) requirements • Standard Operating Procedures (SOPs) • the ability to perform the task to production requirements • work instructions.
Sealing procedures may include the use of:	• elastrator ring • knot • plastic clip • string tie.
Communication skills may include:	• listening and understanding • speaking clearly and directly • sharing information • working with diverse individuals and groups.
