Assessment Requirements for NWPCCO002 Use control centre systems to monitor and control water

Release: 1

Assessment Requirements for NWPCCO002 Use control centre systems to monitor and control water

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- communicating with relevant stakeholders and personnel
- ensuring work is completed within specified timeframes, to quality standards and work requirements
- identifying and investigating potential hazards and safety risks
- managing shift handover according to safety standards and workplace procedures
- prioritising and sequencing work according to work schedules and plans

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- communication techniques
- control centre system capabilities
- problem solving techniques
- project management procedures
- rostering requirements
- work scheduling

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.
