Assessment Requirements for NWPGEN016 Interpret and comply with regulatory requirements

Release: 1

Assessment Requirements for NWPGEN016 Interpret and comply with regulatory requirements

Modification History

Release 1. This is the first release of this unit of competency in the NWP National Water Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes:

- allocating roles and responsibilities to personnel
- determining legal requirements
- determining scope, interpreting and monitoring relevant legislation, regulations and industry standards
- ensuring consent, privacy and confidentiality of information
- ensuring the completion of statutory reporting
- explaining changes and implications of regulatory requirements to personnel
- identifying changes, amendments and emerging issues in legislation
- identifying risks, penalties and consequences for non-compliance
- maintaining business and occupational licenses
- maintaining records
- seeking legal advice
- validating contractor competence and compliance

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of:

- contractor competence and compliance
- non-compliance issues and risks
- regulatory authorities
- relevant legislation, regulations and industry standards
- relevant workplace procedures including privacy principles
- sources of information and advice on regulatory compliance
- statutory reporting requirements

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in suitable workplace operational situations. Where this is not appropriate, assessment must occur in suitable simulated workplace operational situations reflecting actual workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, facilities, equipment and personal protective equipment currently used in industry
- applicable relevant documentation including workplace procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.
