Assessment Requirements for DEFEXO083 Apply explosive ordnance design principles

Release: 2

Assessment Requirements for DEFEXO083 Apply explosive ordnance design principles

Modification History

Release 2. Modifications made to Foundation Skills and Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFEO709D Apply explosive ordnance design principles.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- All Elements and PC rewritten with operational outcome of the unit maintained

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- accessing, interpreting and applying technical information
- applying quantitative and qualitative analysis
- applying research techniques
- determining the characteristics and the performance characteristics of explosive ordnance, components and associated weapons systems

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

- operational knowledge of:
 - analysis processes and techniques
 - characteristics, technical capabilities and limitations of explosive ordnance, components and associated weapons systems
 - design principles of explosive ordnance, components and associated weapons systems
 - explosions and terminal effects
 - explosive chemistry, physics and materials
 - methods of explosive ordnance deployment
 - weapon engineering

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
