PMAOMIR622 Build partnerships to improve incident response capacity

Release: 1

PMAOMIR622 Build partnerships to improve incident response capacity

Modification History

Release 1. Supersedes and is equivalent to PMAOMIR622B Build partnerships to improve incident response capacity

Application

This unit of competency covers the skills and knowledge required to leverage partnerships to improve the organisation's capabilities to respond to incidents.

An incident is an event which causes, or could have caused, injury or illness; damage to plant, material or the environment; disruption to production or public alarm.

An incident is an unintended event, or an unintended consequence of an intended event, such as:

- fire and explosion
- loss of containment
- excursions above/below acceptable limits for emissions or plant conditions
- excursions above occupational hygiene or biological exposure limits
- non-compliance with regulatory requirements
- security breaches
- failure to follow procedures
- complaints
- vehicle incidents
- on/off-site incidents.

This unit of competency applies to senior managers, crisis team managers or those in similar roles who are required to initiate and manage external relationships for joint/cooperative efforts towards incident response and plan, coordinate and evaluate activities with the partners.

Generally, the person would be a member of senior management and a member of the crisis management team. Although independent action may be required, he/she will be expected to coordinate, liaise and consult with other members of the team and other appropriate personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Incident readiness and response

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|---|---|
| 1 | Identify opportunities for specific partnerships | 1.1 Identify opportunities for joint/cooperative efforts towards incident response |
| | | 1.2 Undertake consultation within the organisation to identify the types of partnerships and mutual interest to meet organisational needs |
| | | 1.3 Develop a strategy on the types of partnership organisations and partnership opportunities |
| | | 1.4 Approach specific targeted organisations, discuss expectations, ability to meet those expectations and areas of mutual interest |
| 2 | Develop a framework for the partnership | 2.1 Consult potential partners to develop frameworks that will meet the needs of all partners |
| | | 2.2 Establish the characteristics of the partnership with selected partners |
| | | 2.3 Confirm partnership characteristics, including structure, scale, roles, goals and timeframes with the partners |
| | | 2.4 Develop systems to enhance mutual benefit and value contributions from the partnership |
| | | 2.5 Develop and communicate measures for success to stakeholders |
| | | 2.6 Define an agreed exit strategy |
| 3 | Manage the relationship in | 3.1 Undertake regular consultation, communication and mutual information sharing with all partners |

	order to enhance incident response	3.2	Identify, monitor and review challenges facing the partnership and action issues
		3.3	Seek, communicate, document and review opportunities for learning from the partnership
		3.4	Undertake joint venture exercises to improve incident response capacity where appropriate
		3.5	Provide mutual assistance in ensuring compliance to changes in legislative or regulative requirements
4	Rebuild partnerships after an incident/exercise	4.1	Examine incident with partners
		4.2	Explore issues arising from the incident
		4.3	Follow through and address issues
		4.4	Develop resolutions to prevent re-occurrence
		4.5	Disseminate information and resolutions resulting from discussions appropriately
5	Evaluate the effectiveness of the partnership	5.1	Evaluate flexibility and appropriateness of responses to issues/challenges facing the partnership
		5.2	Evaluate performance against agreed measures
		5.3	Communicate capability to implement the exit strategy to stakeholders

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

Duty of care responsibilities under general work health and safety (WHS) Acts and regulations and state/territory and national standards applying to hazardous substances, dangerous goods and major hazards must be met.

Partnerships

Partnerships must relate to a strategic goal or opportunity, including one or more of the following:

- service that covers a gap in internal capacity/capability
- opportunity to learn specific skills and/or current practices
- share industry knowledge (e.g. compliance requirements and approaches to incident planning)

Partner organisations include one or more of the following:

- parent company
- joint venture partners
- organisations within a given geographical radius
- external agencies

Framework

The framework for the partnership includes:

- size and structure
- roles and responsibilities
- goals
- duration and exit strategy

- systems and/or processes for communications, planning
- measures of performance (qualitative and quantitative)

Challenges Challenges facing a partnership include one or more of the following:

- establishing a cohesive network for effective incident response
- rebuilding the partnership in the event of an incident with partners
- promoting a positive image of the organisation.

Procedures All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

Incident response Incident response includes one or more of the following:

- deployment of site incident response personnel
- containing/controlling the incident at source and/or its spread
- search and rescue operations
- engagement of external emergency services (such as fire, ambulance, rescue and military)
- liaison with other agencies (such as environmental, clean-up and specialised troubleshooters)
- evacuation
- hazard control

Incident response actions must:

- be in accordance with and relevant organisation procedures
- use appropriate response equipment, where required
- prioritise the safety and/or successful recovery of personnel and others affected by the incident response
- **not** inhibit effectiveness of the incident response or further contribute to

the incident

Issues

Issues arising from an incident include one or more of the following:

- inability to contact key partners in the event of a crisis
- response times or objectives confused or outside agreed parameters
- gaps or overlaps in response, which reduce effectiveness of the response
- lack of ability to communicate effectively within the organisation
