Assessment Requirements for PMAOPS550 Develop a colour formulation

Release: 1

Assessment Requirements for PMAOPS550 Develop a colour formulation

Modification History

Release 1. Supersedes and is equivalent to PMAOPS550B Develop a colour formulation

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to:

- communicate effectively with internal and external customers
- confirm end use of product and design specifications
- determine formulations and/or make adjustments to computer suggested formulation to meet specifications, company conditions and standard materials/colourants
- undertake production trials and analyse results
- isolate the causes of variation to desired colour and distinguish between causes of problems, such as:
 - wrong colourant
 - wrong colourant amount
 - wrong grind time/particle size
 - wrong wetting/dispersing
 - differing lighting conditions
 - variable surface finish/gloss level
 - non-metameric matching issues
 - process caused colour differences
- identify and resolve problems
- interpret weathering and other test data
- make both metameric and non-metameric matches
- determine the hazards arising from the colourants chosen.

Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- typical problems and possible solutions
- the 'flare path' on a tonal graph of tone vs time
- optimum grind/particle size for required colour
- balance gloss, opacity and tone
- interaction of colourants and impacts of processing variables on the final colour
- regulatory framework
- hazards that may arise in the job/work environment, and:

- their possible causes
- potential consequences
- appropriate risk controls.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace. Where this is not possible or practical, assessment must occur using a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- In addition, the assessor or anyone acting in subject matter expert role in assessment must demonstrate both technical competency and currency. If the assessor cannot demonstrate technical competency and currency they must assess with a subject matter expert who does meet these requirements.
- Technical competence can be demonstrated through one or more of:
 - relevant VET or other qualification/Statement of Attainment
 - appropriate workplace experience undertaking the type of work being assessed under routine and non-routine conditions
 - appropriate workplace experience supervising/evaluating the type of work being assessed under routine and non-routine conditions

- Currency can be demonstrated through one or more of:
 - being currently employed undertaking the type of work being assessed
 - being employed by the organisation undertaking the type of work being assessed and having maintained currency in accordance with that organisation's policies and procedures
 - having consulted/had contact with an organisation undertaking the type of work being assessed within the last twelve months, the consultation/contact being related to assessment
 - conducting on-the-job training/assessments of the type of work being assessed
 - being an active member of a relevant professional body and participating in activities relevant to the assessment of this type of work
