Assessment Requirements for PMBPROD362E Produce polyurethane products using gravity casting

Release: 1

Assessment Requirements for PMBPROD362E Produce polyurethane products using gravity casting

Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to PMBPROD362 Produce gravity cast polyurethane products.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce polyurethane products using gravity casting at least once to meet job specifications.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- function and operating principles of gravity casting equipment, machine components and ancillary equipment
- importance of machine set-up and warm-up for effective processing of materials
- gravity casting manufacturing process and materials demand
- characteristics of materials and their behaviour in relation to process conditions and stages of production
- the criteria for overall process/equipment readiness for the process or equipment being used
- typical quality standards required at each stage of production
- key variables that may affect product quality and production output:
 - operating temperatures
 - speed of cure
 - colour
 - location of pouring basin
 - cycle time
 - use of separating agents
 - product weight
 - product integrity and general conformance to specification
- typical and atypical process and product problems, including early warning signs, possible causes and corrective actions
- the distinguishing characteristics of causes of problems as being either based on the properties of materials or caused by process variables
- organisational procedures relevant to the work environment or job role

- hazards that may arise in the job or work environment, and:
 - their possible causes
 - potential consequences
 - appropriate risk controls.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors
