Assessment Requirements for PMBWELD304E Design polyethylene plastic pipelines for non-pressure drainage

Release: 1

Assessment Requirements for PMBWELD304E Design polyethylene plastic pipelines for non-pressure drainage

Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed. Assessment Requirements changed. Supersedes and is equivalent to PMBWELD304 Design polyethylene (non-pressure) drainage pipelines.

Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit of competency, and demonstrated the ability to:

- design polyethylene plastic pipelines for non-pressure drainage at least once to meet job specifications.

Knowledge Evidence

There must be evidence the candidate has knowledge of:

- polyethylene materials and non-pressure drainage pipeline components as described in national standards, sufficient to recognise suitability for specific application and to establish work instructions
- selection requirements for polyethylene non-pressure drainage pipeline components
- key variables relating to the installation site and other factors that may affect design
- commissioning requirements and tests.

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
