Assessment Requirements for PPMHRF201 Pack and dispatch recovered fibre

Release: 1

Assessment Requirements for PPMHRF201 Pack and dispatch recovered fibre

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has prepared, packed and dispatched at least two different orders for recovered fibre material, including for each order:

- interpreted recovered fibre order requirements
- operated packaging, wrapping and labelling equipment and materials handling equipment safely and efficiently
- completed accurate labels and dispatch records
- communicated effectively with others, verbally and using hand signals, during packing, loading and dispatch.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and characteristics of recovered fibre material used for pulp production
- workplace procedures relevant to packaging and dispatch of recovered fibre material, including workplace health and safety, high risk load shifting licensing requirements, environmental requirements, and risks and hazard identification
- workplace environmental sustainability requirements and practices for recovered fibre operations, including workplace biotechnological applications and processes and biomass-derived products
- packaging and dispatch area processes, layout and associated services relevant to carry out packaging, storage and dispatch of recovered fibre material
- warehouse organisation and workflow relevant to storage and dispatch of recovered fibre material
- equipment and materials used for packaging, loading and dispatching recovered fibre material

- electronic and other control systems, operation and application to make appropriate adjustments that control packing and dispatching recovered fibre material processes
- freight carrying and load restraint requirements when loading recovered fibre material.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a pulp and/or paper manufacturing facility or an environment that accurately reflects performance in a workplace
- resources, equipment and materials:
 - recovered fibre material
 - equipment and materials for packaging and dispatching recovered fibre material
 - electronic control systems, including digital control system, touch screens or robotics for ordering and dispatching
 - personal protective equipment for packaging and dispatching
 - records system for producing labels and recording dispatch details
- specifications:
 - workplace and standard operating procedures relating to packaging and despatching recovered fibre material, including health and safety, risks and hazards identification, quality, housekeeping and environmental requirements
- relationships:
 - relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
