Assessment Requirements for PPMQAS201

Apply basic quality practices

Release: 1

Assessment Requirements for PPMQAS201 Apply basic quality practices

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has applied basic quality practices to work processes for at least two operational intervals, including for each interval:

- identified the product quality requirements and quality procedures for work being undertaken
- monitored and interpreted information, in relation to process control points and inspections, to maintain product quality
- prioritised corrective action, based on potential risk or loss or damage if the required actions are not performed
- implemented corrective action to maintain product quality, in adjusting processes or reporting non-conforming performance or process
- used workplace communication system to record and report product performance.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace quality standards and procedures related to own work role
- basic problem-solving techniques related to meeting quality standards and procedures
- procedures for inspections, set point values and testing used to maintain specified product quality
- steps to take in undertaking corrective actions to respond to defects in production or product quality
- communication mechanisms used in the workplace to report on quality processes.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a pulp and/or paper manufacturing facility or an environment that accurately reflects performance in a workplace
- resources, equipment and materials:
 - plant and equipment related to operation being undertaken
 - maintenance tools and equipment and consumables to rectify quality issues
 - testing and diagnostic equipment
 - personal protective equipment for operation being undertaken
 - proforma or recording system for recording quality data and information
- specifications:
 - workplace quality standards and procedures
 - workplace and standard operating procedures relating to operation being undertaken, including health and safety, risks and hazards identification, plant isolation, quality, housekeeping and environmental requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
