Assessment Requirements for PPMQAS501

Evaluate production processes for regulatory and quality compliance

Release: 1

Assessment Requirements for PPMQAS501 Evaluate production processes for regulatory and quality compliance

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has effectively monitored and evaluated the production processes of pulp or papermaking that apply in own area of responsibility, to ensure compliance with legislation, regulations and quality standards on at least one occasion, including:

- reviewed workplace procedures and work practices for compliance with legal and regulatory requirements and industry standards
- conducted a risk and hazard identification audit and established critical control limits, measures and corrective actions
- analysed production activities and product monitoring data for effectiveness of quality standards and procedures
- identified and managed at least one non-compliance issue.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislation, regulations and standards relevant to the pulp and paper manufacturing industry and facilities, including:
 - workplace health and safety, including facility and high risk work licencing and permits
 - major hazards facilities
- industry quality standards and the organisation's quality management systems relevant to the production of pulp and paper, including:
 - environmental standards, including recycling and waste
 - product quality
 - sustainable fibre sourcing

- sampling and testing standards
- process for conducting risk and hazard identification and determining critical control limits, measures and corrective actions
- processes used to monitor regulatory compliance and quality practices in work operations and procedures
- purpose and process used for conducting and documenting a deviation investigation
- methods used for training staff and contractors on policies and procedures
- processes used to address and report on non-compliance of regulatory and quality requirements.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a pulp and/or paper manufacturing facility or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - workplace recording system
- specifications:
 - legislation and regulations related to the production of pulp and paper
 - workplace quality system
 - workplace procedures relating to the pulp and paper manufacturing operations
- relationships:
 - staff and/or contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
