Assessment Requirements for PPMRES203 Distribute woodchips

Release: 1

Assessment Requirements for PPMRES203 Distribute woodchips

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has distributed woodchips to a pulp storage facility according to two different work orders, including for each order:

- planned work tasks according to distribution requirements
- operated transfer equipment and chip distributor safely and efficiently
- completed accurate labels and dispatch records
- communicated effectively and worked safely with others when undertaking distribution.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- types and characteristics of wood types and grades used for pulp production
- workplace procedures relevant to woodchip distribution, including workplace health and safety, high risk load shifting licensing requirements, environmental requirements, and risks and hazard identification
- workplace environmental sustainability requirements and practices for woodchip distribution, including workplace biotechnological applications and processes and biomass-derived products
- woodchip distribution area layout and associated services, including operating parameters, variation and associated adjustments
- woodchip pile segregation purpose and techniques
- transfer and distribution equipment fault identification and corrective action
- electronic and other control systems, operation and application to make appropriate adjustments that control woodchip distribution system.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a pulp and/or paper manufacturing facility or an environment that accurately reflects performance in a workplace
- resources, equipment and materials:
 - woodchip for distribution
 - woodchip distribution system
 - equipment and materials for transferring and distributing woodchips
 - electronic control systems, including digital control system, touch screens or robotics to control woodchip distribution system
 - personal protective equipment for undertaking distribution tasks
 - records system for producing labels and recording woodchip distribution details
- specifications:
 - workplace and standard operating procedures relating to woodchip distribution, including health and safety, risks and hazards identification, quality, housekeeping and environmental requirements
- relationships:
 - relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
