Assessment Requirements for PPMWAR201 Store product

Release: 1

Assessment Requirements for PPMWAR201 Store product

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has stored paper product on at least two occasions, including for each occasion:

- maintained a safe and clean working environment
- operated control system and shifting equipment safely and efficiently during shifting and storing operations
- responded to non-conforming products
- completed accurate inventory records
- communicated effectively with others, verbally and using hand signals, throughout shifting and storing operations.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace documentation and procedures relevant to storage of paper product in pulp and paper warehouses, including workplace health and safety, risks and hazard identification, high risk load shifting licensing requirements and operating procedures, plant clearance, housekeeping and environmental requirements
- workplace forms used in shifting and storing product, and their purpose, including job safety sheet, permit systems, weighbridge dockets, work orders, delivery dockets, invoices, stock inventory records and dispatch reports
- situational awareness when shifting and storing paper product, including awareness of personnel, hazards, moving trucks and equipment
- operating parameters, variation and associated adjustments for product storage processes, layout and associated services
- stacking procedures and their implications for different storage areas
- load types, specifications and characteristics
- key features of warehouse organisation, workflow procedures and inventory systems

- purposes of stock rotation of stored products
- use of electronic and other control systems, operation and application to make appropriate adjustments that control storage of product.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a paper manufacturing warehouse facility or an environment that accurately reflects performance in a workplace
- resources, equipment and materials:
 - mechanical handling equipment
 - equipment and materials for storing operations
 - electronic control systems, including digital control system, touch screens or robotics for receiving, shifting and storing paper product
 - personal protective equipment for shifting and storing paper product
 - records system for recording details of paper products inventory
- specifications:
 - workplace and standard operating procedures relating to storing paper product, including health and safety, risks and hazards identification, quality, housekeeping and environmental requirements
- relationships:
 - relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
