Assessment Requirements for PPMWAR203 Package warehouse product

Release: 1

Assessment Requirements for PPMWAR203 Package warehouse product

Modification History

Release	Comments
Release 1	This version released with PPM Pulp and Paper Manufacturing Training Package Version 3.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has safely operated both the packaging and wrapping product system to meet the requirements of at least two different orders, including for each order:

- undertaken preparations and safety requirements prior to packaging product
- identified causes and effects of equipment or system faults, and taken the appropriate corrective action
- identified and monitored process control points during packaging and wrapping operations
- used electronic and other control systems to control equipment to package product
- communicated effectively and worked safely with others when undertaking packaging.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace documentation and procedures relevant to packaging products, including:
 - workplace health and safety procedures, including activity or task specific high risk load shifting licensing requirements, plant clearance, job safety analysis, permit systems
 - standard operating and housekeeping procedures for production and packaging schedules
 - quality procedures and quality assurance documentation
 - environmental sustainability requirements and practices
 - plant manufacturing operating manuals
 - oil or chemical spills and disposal guidelines
 - plant isolation documentation
 - work and customer orders

- Safety Data Sheets (SDS)
- causes and effects of equipment or system faults, and required corrective action
- use of manual transfer techniques and requirements
- operating parameters, variation and associated adjustments for packaging, processes, layout and associated services
- key features of maintenance systems including operator-level maintenance, operator maintenance schedules, maintenance suppliers and proactive maintenance strategies
- use of electronic and other control systems, operation and application to make appropriate adjustments to control packaging of product.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated in a paper manufacturing warehouse facility or an environment that accurately reflects performance in a workplace
- resources, equipment and materials:
 - equipment and materials for packaging warehouse products
 - electronic control systems, including digital control system, touch screens or robotics for packaging
 - maintenance tools and equipment, and consumables for product packaging equipment
 - personal protective equipment suitable for packaging
 - records system for recording system and product faults, diagnostic and corrective action processes
- specifications:
 - workplace and standard operating procedures relating to packaging warehouse products, including health and safety, risks and hazards identification, quality, housekeeping and environmental requirements
- relationships:
 - relevant personnel for the purposes of communicating information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
