## PPMWAR250 Store product

### Modification History

| Release | Comment                                                                                                                                                                                                                           |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | Replaces equivalent unit FPPWAR250A Store product, which was first released with FPP10 Pulp and Paper Manufacturing Industry Training Package Version 1.0.<br>This is the first release of this unit in the new standards format. |

### Application

This unit of competency describes the outcomes required to prepare, check and store products, in a pulp or paper manufacturing facility.

The unit applies to production support operators who receive and store product.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Pulp and Paper Manufacturing

### Elements and Performance Criteria

| ELEMENTS                                  | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Elements describe the essential outcomes. | Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.                                                                                                                                                                                           |
| 1. Prepare to store product               | 1.1. Check work order, plant, systems and equipment in accordance with workplace health and safety (WHS) requirements, environmental sustainability and safe working requirements and practices, Standard Operating Procedures (SOP), and housekeeping requirements.<br>1.2. Receive, interpret and verify load or product documentation.<br>1.3. Identify load handling characteristics. |

| ELEMENTS            | PERFORMANCE CRITERIA                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     | 1.4. Select appropriate mechanical handling equipment.<br>1.5. Undertake a pre start check on mechanical handling equipment.                                                                                                                                                                                                                                                               |
| 2. Store product    | 2.1. Lift, carry and set down load with mechanical handling equipment.<br>2.2. Store load at the specified location, in compliance with other storage requirements.<br>2.3. Identify product faults through observation and quality assessments of products.<br>2.4. Remove non conforming product.<br>2.5. Maintain situational awareness in storage area.<br>2.6. Complete housekeeping. |
| 3. Document product | 3.1. Complete inventory records.<br>3.2. Document storage product information and take appropriate actions.<br>3.3. Communicate relevant information to appropriate personnel.                                                                                                                                                                                                             |

## Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

|                               |                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Numeracy skills to:           | <ul style="list-style-type: none"> <li>interpret instruments, gauges and data recording equipment.</li> </ul>                                                                                                                                                                                                                                                                                        |
| Writing skills to:            | <ul style="list-style-type: none"> <li>record and report product information accurately and legibly using correct technical vocabulary.</li> </ul>                                                                                                                                                                                                                                                   |
| Oral communication skills to: | <ul style="list-style-type: none"> <li>select and use appropriate spoken communication strategies with work teams and other personnel on site, during storage operations.</li> </ul>                                                                                                                                                                                                                 |
| Reading skills to:            | <ul style="list-style-type: none"> <li>read and interpret documentation, procedures and reports.</li> </ul>                                                                                                                                                                                                                                                                                          |
| Problem solving skills to:    | <ul style="list-style-type: none"> <li>maintain situational awareness in the work area.</li> </ul>                                                                                                                                                                                                                                                                                                   |
| Technology skills to:         | <ul style="list-style-type: none"> <li>access, navigate and enter computer based information for storing of product including inventory systems, non conforming product and customer orders</li> <li>use electronic and other control systems to make appropriate adjustments, that control storage of product</li> <li>operate materials handling and high risk load shifting equipment.</li> </ul> |
