Assessment Requirements for PPMWAR280 Warehouse product packaging

Release: 1

Assessment Requirements for PPMWAR280 Warehouse product packaging

Modification History

Release	Comment
1	Replaces equivalent unit FPPWAR280A Warehouse product packaging, which was first released with FPP10 Pulp and Paper Manufacturing Industry Training Package Version 1.0. This is the first release of this unit in the new standards format. Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- operating packaging and wrapping product systems, at least twice in line with required enterprise intervals
- undertake preparations to package product
- identify causes and effects of packaging equipment or system faults and takes corrective action
- identify and monitor process control points when packaging product
- use mechanical handling and loading equipment to lift, carry and set down loads
- use electronic and other control systems to control equipment to package product
- communicate effectively and work safely with others, in the work area when undertaking packaging.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace documentation and procedures relevant to packaging procedures and responsibilities, in the pulp and paper industry and covering:
 - work health and safety (WHS) procedures including activity or task specific high risk load shifting licensing requirements, plant clearance, job safety analysis, permit systems
 - freight transport regulations including load limits and restraint, driver fatigue and train of responsibility

- Standard Operating Procedures (SOP) and housekeeping procedures for production and packaging schedules
- quality procedures and quality assurance documentation including ISO 9002
- environmental sustainability requirements and practices
- plant manufacturing operating manuals
- oil or chemical spills and disposal guidelines
- plant isolation documentation
- work and customer orders
- Material Safety Data Sheets (MSDS)
- causes and effects of equipment or system faults and required corrective action
- use of manual transfer techniques and requirements
- operating parameters, variation and associated adjustments for packaging, processes, layout and associated services, within level of responsibility
- key features of maintenance systems including operator level maintenance as per site agreements, operator maintenance schedules, maintenance suppliers and pro-active maintenance strategies
- use of electronic and other control systems, operation and application to make appropriate adjustments, which control packaging of product, within level of responsibility.

Assessment Conditions

The following resources must be made available:

- access to the full range of equipment and documentation involved in warehouse product packaging operations, in a pulp or paper manufacturing facility.
- warehouse product packages which can be unitised pallets, customer rolls and reels, cartons, polybundles.
- fully automated, semi-automated, manually operated plant and equipment appropriate to product packaging
- maintenance tools and equipment and consumables for product packaging equipment
- personal protective equipment suitable for warehouse product packaging
- relevant personnel for the purposes of communicating information
- template documents for recording system and product faults, diagnostic and corrective action processes
- organisational workplace health and safety and standard operating procedures for warehouse product packaging.

Competency is to be assessed in the workplace or in a productive environment that accurately reflects performance in a workplace.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and

- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
