PSPGEN106 Conduct research and analysis

Release: 1

PSPGEN106 Conduct research and analysis

Modification History

Supersedes and is not equivalent to PSPGEN046 Undertake research and analysis.

Application

This unit describes the performance outcomes, skills and knowledge required to undertake research and analysis.

This unit applies to those working in generalist and specialist roles within the public sector. Those undertaking this unit performing complex tasks in a range of familiar contexts.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

General

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Identify and plan research.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Define information needs based on work objectives and client and organisational requirements.
- 1.2. Evaluate and select potential sources of information and the format in which they are presented in line with the purpose and audience for the research.
- 1.3. Develop and confirm strategies to acquire required information.

- | | |
|---|--|
| 2. Collect and store research information. | <ul style="list-style-type: none">2.1. Research information according to the plan and within resource allocation.2.2. Assess initial search results and address gaps using the same or adjusted research strategies.2.3. Communicate the methods and outcomes of research, and the criteria used to make information decisions and choices.2.4. Store research information in accordance with security requirements and organisational policies and procedures. |
| 3. Analyse information and apply the results of analysis. | <ul style="list-style-type: none">3.1. Examine, compare and evaluate information from various sources for content, structure and logic.3.2. Select analytical techniques and processes in line with defined objectives.3.3. Collate, consolidate and analyse information and advise senior staff and others as required of outcomes.3.4. Identify facts, issues, patterns, interrelationships and trends through analysis in accordance with research aims.3.5. Meet agreed project timelines and defined standards of the organisation. |
| 4. Maintain information systems. | <ul style="list-style-type: none">4.1. Maintain, validate and reconcile information systems to assure data and system integrity.4.2. Maintain standard and complex information systems and applications in accordance with organisational requirements.4.3. Review and update information systems. |
| 5. Compile reports from information systems. | <ul style="list-style-type: none">5.1. Synthesise the findings from information analysis to address the purpose of the research and meet requirements.5.2. Determine and organise content of reports to meet client and organisational requirements.5.3. Demonstrate that assumptions and conclusions used in analysis are clear, justified, supported by evidence and consistent with research strategy. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	• DESCRIPTION
Oral communication skills to:	• explain research and analysis plans, methods and outcomes aligned to client requirements and purpose.
Writing skills to:	• present research findings, recommendations and issues in required format, using language, structure and style appropriate to audience.
Numeracy skills to:	• interpret and synthesise statistical data with related information to make predictions and validate research outcomes.
Problem solving skills to:	• identify and address constraints.

Unit Mapping Information

Supersedes and is not equivalent to PSPGEN046 Undertake research and analysis.
