PSPTIS109 Read and analyse general purpose LOTE texts to be translated

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to read and analyse a message in a general-purpose LOTE text for the purpose of later transfer to a designated target language. It requires identifying the key linguistic, cultural, societal and situational elements to be conveyed in the language transfer process.

This unit applies to those working as translators of general-purpose texts in any language.

General purpose texts convey information in translated texts to a limited and known audience or convey community messaging to an audience in translated spoken or signed texts, with the same functional effect as the source texts and which are accurate and appropriate to the context, target audience and end use. General purpose texts contain limited equivalence problems between source and target text, plain language and concepts accessible to the general public and there is limited requirement for research on the subject beyond client resources.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian Standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.
