PSPSS00029 Radiation Environment Safety Skill Set

Release: 1

PSPSS00029 Radiation Environment Safety Skill Set

Modification History

Release	TP Version	Comments
1	PSP12 V1	First release. Supersedes and equivalent to PSP04 Radiation Environment Safety Skill Set.

Description

Not applicable.

Pathways Information

This unit from PSP12 Public Sector Training Package is introductory and serves as a foundation for those who may become more involved in radiation-related roles.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

PSPRAD201	Work safely in a radiation environment
-----------	--

Target Group

This skill set is for those who require radiation protection and site safety training in addition to induction training, prior to undertaking operational, technical, and/or maintenance tasks in a radiation environment.

Such personnel may work in mines, construction sites, hospitals and laboratories and may include:

- utility and site service personnel, such as electricians, plumbers, fitters, and equipment service technicians
- site cleaners and maintenance workers
- operators of equipment that emits ionising radiation
- those who handle and/or transport radioactive material
- those who use radionuclides

Suggested words for Statement of Attainment

This unit meets industry requirements for workers in contact with radiation as part of other roles who may receive occupational exposures of greater than 1 millisievert per annum and who need to be competent and take action to avoid unacceptable exposure to radiation hazards, or to ensure that others are not unacceptably exposed to radiation hazards due to their work.
