Assessment Requirements for PUAEMR004 Manage risk treatment implementation

Release: 1

Assessment Requirements for PUAEMR004 Manage risk treatment implementation

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two separate occasions and includes

- applying a range of media communication and methods to communicate with stakeholders
- communicating treatment plan
- confirming implementation context
- developing implementation plan
- facilitating treatment plan implementation
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- identifying practical constraints for existing control measures with stakeholders
- monitoring and reviewing treatment plan implementation
- stakeholder networking and relationship building
- working with stakeholder groups

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- analytical, problem solving and decision making techniques to facilitate monitoring progress against targets
- emergency risk management concepts and principles including industry standards
- jurisdiction and organisational documentation and reporting procedures
- jurisdictional and organisational responsibilities for implementing risk treatment options
- legislative and regulatory requirements relevant to implementing risk treatments
- options for communicating with stakeholders
- organisational policies and procedures including
 - arrangements in legislation
 - existing disaster plans, agreements and/or memorandums of understanding
 - facility emergency response plan

- local planning regulations, development controls and environmental plans
- organisational or jurisdictional emergency risk management policies or procedures
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including risk mitigation
- performance criteria for assessing treatment implementation including
 - continuous monitoring of maintenance of equity
 - continued involvement of stakeholders
 - cost effectiveness of treatment
 - evaluation in terms of actual risk reduction
 - evaluation of need for redefinition of policy
 - feedback mechanism
 - consideration of change that takes place over time
- practical constraint requirements and context including
 - arrangements, roles and responsibilities set down in existing facility emergency response plans
 - availability of technical expertise, technology and equipment
 - budgets, time, availability and capability of people
 - land use planning
 - legislation covering emergency and environmental management, safety standards and local government regulations
 - limited community knowledge of emergency risk management processes and benefits
 - political, social and cultural considerations

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Candidates must demonstrate that they have developed criteria to monitor implementation progress, report on progress and communicate and consult with stakeholders. They must present evidence from at least two different contexts, one of which may be simulated.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations

- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.
