- risk management principles and processes
- types of plans implemented by USAR teams
- USAR team plans including operations portion of incident action plan

- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) legislated requirements

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in organisationally approved simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment used in industry including
 - operational documentation arising from deployment
 - post incident analysis and organisational or agency debriefings
 - templates for reporting
- applicable documentation, including organisational procedures, equipment specifications, regulations, codes of practices and operations manuals.
