Assessment Requirements for RGRSWA302 Collect non-blood samples from racing personnel

Release: 1

Assessment Requirements for RGRSWA302 Collect non-blood samples from racing personnel

Modification History

Release	Comments
Release 1	This version released with RGR Racing and Breeding Training Package Version 2.0.

Performance Evidence

An individual demonstrating competency in this unit must satisfy all of the elements and performance criteria of this unit. There must be evidence that the individual has:

- interpreted instructions, prepared and confirmed sample collection arrangements with stewards
- identified, prepared and briefed racing personnel involved in the collection process
- tested and/or collected the following non-blood samples, with at least three racing personnel:
 - urine
 - breathalyser testing
- followed laboratory procedures, including safety, security and chain of custody protocols for samples.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- protocols and procedures for communicating with stewards, and licensed and other racing industry personnel
- swabbing and sample collection protocols and associated ethical conduct and rules of racing
- types and purpose of equipment for collecting samples, including personal protective equipment
- racing industry safety requirements for collecting non-blood samples, including:
 - safe operating procedures
 - hazard identification
 - risk control
- laboratory protocols and standard operating procedures for collecting non-blood samples, including:

- urine
- breathalyser testing
- other non-invasive samples
- laboratory protocols and standard operating procedures for completing documentation and reporting information and irregularities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - safe and appropriate racing sample collection facility or an environment that accurately reflects performance in a real workplace setting
- resources, equipment and materials:
 - personnel for collection of non-blood samples
 - workplace instructions and laboratory procedures and reporting documentation
 - equipment for collecting non-blood samples
 - personal protective equipment correctly fitted and appropriate for activity for individual
- relationships (internal and/or external):
 - racing officials or other relevant people to report to.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
