RIIDES303D Inspect, test and maintain cooling systems on diesel engine systems

Release: 2

RIIDES303D Inspect, test and maintain cooling systems on diesel engine systems

Modification History

Release	Comment
1	This unit replaces RIIDES303 Inspect, test and maintain cooling systems on diesel engine systems
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to inspect, test and maintain cooling systems on diesel engine systems in Coal mining.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of this unit.

Unit Sector

Coal mining

Elements and Performance Criteria

1. Plan for inspection, testing and maintenance of cooling systems on diesel engine systems	1.1 Access, interpret, inspect, test and maintain cooling systems on diesel engine systems apply documentation and ensure the work activity is compliant 1.2 Obtain, interpret clarify, confirm and apply verbal and written work instructions 1.3 Conduct a toolbox talk with others at the site prior to commencing and during work activities 1.4 Identify, address and report potential hazards, risks and environmental issues and implement control measures 1.5 Obtain and interpret emergency procedures, and be prepared
---	--

	for an emergency
2. Prepare for inspection, testing and maintenance of cooling systems on diesel engine systems	2.1 Coordinate activities with others prior to commencement of, during, and on completion of the work activity 2.2 Identify and obtain items and tools required for the safe, effective and efficient conduct of the tasks 2.3 Select and wear personal protection equipment appropriate for work activities 2.4 Access, interpret and apply equipment pre-start procedures 2.5 Access and apply isolation and lock-out of all equipment necessary for the safe execution of tasks
3. Carry out inspection of cooling systems	3.1 Inspect cooling systems on diesel engine systems 3.2 Diagnose and record existing or identified faults and recommend corrective actions 3.3 Report outcomes of inspection
4. Carry out testing of cooling systems	4.1 Access and operate testing equipment 4.2 Carry out testing and fault finding of cooling systems 4.3 Diagnose and record existing identified faults and recommend corrective actions 4.4 Report outcomes of testing
5. Carry out maintenance of cooling systems	5.1 Identify, access and use maintenance tools and equipment 5.2 Identify, interpret and apply corrective actions 5.3 Carry out maintenance of cooling systems on diesel engine systems
6. Conduct housekeeping activities	6.1 Clean, check, maintain and store plant, tools and equipment 6.2 Report issues identified with plant, tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIDES303D Inspect, test and maintain cooling systems on diesel engine systems

Modification History

Release	Comment
1	This unit replaces RIIDES303 Inspect, test and maintain cooling systems on diesel engine systems
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the inspection, testing and maintenance of cooling systems on diesel engine systems that meets all of the required outcomes including:
 - preparing for and organising work activities to meet all task requirements
 - communicating clearly and concisely with others to receive and clarify work instructions
 - using a range of communication techniques and aids to advise others of work activity and exclusion zones
 - monitoring movements and hazards and identifying and communicating changes to the work environment during the work process
- demonstrates completion of inspecting, testing and maintaining cooling systems on diesel engine systems that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - selecting and operating testing equipment and methods
 - carrying out testing and fault finding of cooling systems
 - diagnosing and recording existing identified faults
 - carrying out maintenance of cooling systems on diesel engine systems in accordance with the work requirements

Knowledge Evidence

The candidate must demonstrate knowledge of the following when inspecting, testing and maintaining cooling systems on diesel engine systems through:

- site risk, statutory compliance, health, safety, environmental, quality and communication requirements and procedures
- limitations on allowable maintenance including work in hazardous environments
- limitations on allowable modifications and the required controls and procedures
- site and manufacturer's requirements and procedures
- items required to be used in performance of inspection, testing and maintenance tasks
- tools required for the performance of inspection, testing and maintenance tasks
- site inspection, testing and maintenance support requirements and availability
- site work area inspection requirements
- site work area safeguarding options and requirements
- site isolation and lock-out requirements and procedures
- site hazard and emergency procedures

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert
-----------------	-------------	---

		experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
