**Release: 2**

## RIIENV401D Supervise dust and noise control

### Modification History

| Release | Comment                                                                                                                                                                                                                                                                                                         |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | This unit replaces RIIENV401A Supervise dust and noise control                                                                                                                                                                                                                                                  |
| 2       | Required frequency and volume of evidence amended in Performance evidence.<br>Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |

### Application

This unit describes a participant's skills and knowledge required to supervise dust and noise control in Coal and Metalliferous mining and Extractive.

This unit is appropriate for those working in supervisory and technical specialist roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Coal mining

Extractive

Metalliferous mining

### Elements and Performance Criteria

|                                                |                                                                                                                                                                                                                                                                                |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 Access and share requirements and procedures | 1.1 Access, interpret and apply dust and noise documentation and ensure the work activity is compliant<br>1.2 Provide information in a language, style and format that is easily understood<br>1.3 Explain the health and environmental implications of non-conformance to all |
| 2 Plan and implement site requirement          | 2.1 Plan control measures and work practices with colleagues to ensure compliance<br>2.2 Implement control measures and work practices to ensure compliance                                                                                                                    |

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                              | 2.3 Plan and implement dust and noise monitoring<br>2.4 Identify dust and noise control training needs and implement training as required                                                                                                                                                                                                                                                                                                |
| 3 Monitor, adjust and report | 3.1 Identify, rectify and report actual/potential dust and noise problems promptly and decisively to ensure compliance<br>3.2 Manage activities so that potential non-compliance issues are minimised<br>3.3 Submit recommendations on improvements in dust and noise control<br>3.4 Inform individuals/teams of the results of improvements in dust and noise control<br>3.5 Maintain systems, written records and reporting procedures |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

## Unit Mapping Information

RIIENV401A Supervise dust and noise control
