Assessment Requirements for RIIERR202E Contribute to the control of emergencies and critical situations

Release: 1

Assessment Requirements for RIERR202E Contribute to the control of emergencies and critical situations

Modification History

Release	Comment
1	This unit replaces RIERR202D Contribute to the control of emergencies and critical situations. Element and two performance criteria removed. Performance and knowledge evidence substantially amended.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include that the candidate:

- locates and applies relevant documentation, policies and procedures to contribute to the control of emergencies and critical situations
- implements requirements, procedures and techniques for the safe, effective control of emergencies and critical situations including:
 - identifying effects of changes of ambient conditions on operations
 - reading and interpreting drawings and manuals
 - operating equipment
 - applying manual handling techniques
- works with others to undertake the control of emergencies and critical situations that meets all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
 - communicating to confirm work/plans/specifications
- demonstrates completion of the contribution to the control of emergencies and critical situations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - contributing to the control of critical situations including:
 - activating relevant alarms
 - quickly and competently closing the well
 - initiating actions in response to critical situations
 - responding to emergencies
 - applying safe manual handling techniques when lifting, pushing, pulling, carrying or restraining objects

- participating in fire drills
- providing assistance in the application of first aid and medivac procedures

Knowledge Evidence

The candidate must demonstrate knowledge of the following when contributing to the control of emergencies and critical situations:

- emergencies and critical situations
- fire and gas control system
- isolation and permit to work systems
- emergency shutdown control procedure

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	AQF** Level	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the Unit code should be considered to indicate the AQF level.
