# **Assessment Requirements for RIIHAN210D Perform intermediate rigging operations**

**Release: 4**

## Assessment Requirements for RIIHAN210D Perform intermediate rigging operations

### Modification History

| Release | Comment                                                                                                                                                                                                                                                                                                      |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | This unit replaces RIIHAN210A Perform intermediate rigging operations.                                                                                                                                                                                                                                       |
| 2       | Amend Knowledge Evidence to include requirement to have Dogger experience/training and Basic rigging experience/training; Amend reference to Licensing requirements in Unit Application                                                                                                                      |
| 3       | Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm. |
| 4       | This version was released with RII Resources and Infrastructure Training Package version 3.0.                                                                                                                                                                                                                |

### Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient performance of intermediate rigging operations including:
  - conducting risk assessment and implementing controls
  - correctly applying and using all rigging and associated equipment
  - maintaining written rigging records
- works effectively with others to undertake and complete the performance of intermediate rigging operations that meet all of the required outcomes including:
  - checks and verifies work activity with client, load designer and others
  - communicating hazards and determining elimination or control of hazards
  - using a range of communication techniques and systems to convey instruction or information to others
  - provides end of work handover to relevant personnel

- demonstrates completion of performing intermediate rigging operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
  - writing a preliminary rigging plan which must include the following points in detail:
    - confirmed details of rigging requirement
    - confirmed dimensions
    - site access and egress
    - suitability and availability of materials
    - tools and equipment
    - identification of potential hazards
    - control measures
    - identification of site coordination requirements
    - unless otherwise specified, rigging is to conform with the requirements of any relevant National Certification and/or Standards
  - performing mathematical calculations for estimation and measurement of loads
  - identifying, selecting, inspecting, assembling and confirming as serviceable all of the following:
    - rigging equipment
    - materials
    - tools
  - installing fall arrest equipment with ground level installation
  - using rope to attach tag lines using knots, bend and hitches
  - using ropes for splices and whipping techniques
  - safely moving and correctly relocating the load
  - performing work safely at heights
  - dismantle and remove/restore load shifting equipment
  - clear the work area, check equipment and complete all documentation and reporting requirements
- 

## Knowledge Evidence

The candidate must demonstrate knowledge of the following when performing intermediate rigging operations:

- complying with National Standard for High Risk Worksite and equipment safety requirements
- equipment characteristics, technical capabilities and limitations
- operational and maintenance procedures
- hand and whistle signals
- crane operations and limitations
- safe work method statements
- safety data sheets

- practices and regulation for dogging and basic rigging
- 

## Assessment Conditions

Mandatory conditions for assessment of this unit are stipulated below.

The assessment must:

- include access to:
  - rigging tools and equipment
  - load to be shifted
  - personal protective equipment
- be conducted in a safe environment
- be assessed in context of the sector's work environment
- be assessed in compliance with relevant legislation and regulations and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed
- confirm consistent performance can be applied in a range of relevant workplace circumstances.

Where personal safety or environmental damage are limiting factors, assessment may occur in a simulated work environment\* provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

### Assessor requirements

Assessors must be able to clearly demonstrate current and relevant industry knowledge and experience to satisfy the mandatory regulatory standards as set out in the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory requirements for assessors current at the time of assessment and any relevant licensing and certification requirements.

This includes:

- vocational competencies at least to the level being delivered and assessed
- current industry skills directly relevant to the training and assessment being provided
- current knowledge and skills in vocational training and learning that informs their training and assessment
- formal relevant qualifications in training and assessment
- having knowledge of and/or experience using the latest techniques and processes
- possessing the required level of RII training product knowledge
- having an understanding and knowledge of legislation and regulations relevant to the industry and to employment and workplaces
- demonstrating the performance evidence, and knowledge evidence outlined in this unit of competency, and
- the minimum years of current\*\* work experience after competency has been obtained as specified below in an industry sector relevant to the outcomes of the unit.

- It is also acceptable for the appropriately qualified assessor to work with an industry expert to conduct assessment together and for the industry expert to be involved in the assessment judgement. The industry expert must have current industry skills directly relevant to the training and assessment being provided. This means the industry subject matter expert must demonstrate skills and knowledge from the minimum years of current work experience after competency has been obtained as specified below, including time spent in roles related to the unit being assessed:

| Industry sector                                                                            | AQF indicator level***                                                                                                                                                                                                                                                                                                         | Required assessor or industry subject matter expert experience |
|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|
| Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction | 1                                                                                                                                                                                                                                                                                                                              | 1 Year                                                         |
|                                                                                            | 2                                                                                                                                                                                                                                                                                                                              | 2 Years                                                        |
| Drilling, Coal Mining, Extractive (Quarrying), Metalliferous Mining and Civil Construction | 3-6                                                                                                                                                                                                                                                                                                                            | 3 Years                                                        |
| Other sectors                                                                              | Where this unit is being assessed outside of the resources and infrastructure sectors assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no industry standard is specified should comply with any relevant regulation. |                                                                |

\*Guidance on simulated environments has been stipulated in the RII implementation guide located on VETNet.

\*\*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting a minimum number of site assessments as determined by the relevant industry sector, across various locations.

\*\*\* While a Unit of Competency does not have an AQF level, where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered as the AQF indicator level for assessment purposes.
