RIIHAN311E Conduct operations with integrated tool carrier

Release: 1

RIIHAN311E Conduct operations with integrated tool carrier

Modification History

Release	Comment
1	This unit replaces RIIHAN311D Conduct operations with integrated tool carrier. Amended performance evidence wording and made grammatical changes. Added mapping table.

Application

This unit describes a participant's skills and knowledge required to conduct operations with integrated tool carrier in Coal and Metalliferous mining.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Coal mining

Metalliferous mining

Elements and Performance Criteria

1. Plan and prepare for integrated tool carrier operations	1.1 Access, interpret and apply integrated tool carrier documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Select and wear personal protective equipment appropriate for work activities 1.4 Identify and select any required tools and equipment, check for serviceability and rectify or report, verbally or in writing, any faults prior to commencement 1.5 Identify and address potential risks, hazards and environmental issues, and implement control measures 1.6 Perform equipment pre-start and post-start checks 1.7 Carry out start-up procedures 1.8 Communicate with other equipment operators and personnel
--	---

	using approved communication methods 1.9 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Lift and move load	2.1 Operate equipment safely within limitations 2.2 Monitor and manage equipment performance using appropriate indicators/gauges 2.3 Assess site conditions, position equipment and ensure safety of other equipment and personnel 2.4 Communicate with Dogman to ensure appropriate slings and lifting gear are selected 2.5 Communicate with Dogman to ensure load and equipment is secured and stable 2.6 Ensure approved signals are used to receive guidance on movement of equipment 2.7 Complete all written documentation clearly, concisely and on time
3. Complete operations	3.1 Prepare integrated tool carrier for relocation 3.2 Move integrated tool carrier between worksites 3.3 Park integrated tool carrier and prepare for maintenance and shutdown 3.4 Inspect equipment for faults
4. Select, remove and fit attachments	4.1 Select attachment for the work activity 4.2 Remove, fit and test attachment 4.3 Use attachment for intended purpose 4.4 Remove, clean and store attachment
5. Carry out post-operational procedures	5.1 Inspect, fault find and report faults, verbally or in writing 5.2 Carry out routine operator servicing, maintenance and housekeeping tasks 5.3 Maintain and process written records and reports 5.4 Carry out minor operator maintenance to manufacturer's instructions and site requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
RIIHAN311E Conduct operations with integrated tool carrier	RIIHAN311D Conduct operations with integrated tool carrier	Amended performance evidence wording and grammatical changes. Added mapping table.	Equivalent

Assessment Requirements for RIIHAN311E Conduct operations with integrated tool carrier

Modification History

Release	Comment
1	This unit replaces RIIHAN311D Conduct operations with integrated tool carrier. Amended performance evidence wording and made grammatical changes. Added mapping table.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient conduct of operations with an integrated tool carrier including:
 - interpreting ground conditions
 - driving
 - lifting and moving
 - refuelling vehicles
- works effectively with others to undertake and complete conducting of operations with an integrated tool carrier that meet all of the required outcomes including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to coordinate work activities
- demonstrates completion of conducting operations with integrated tool carriers that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - lifting and moving load
 - monitoring, assessing and adjusting equipment performance
 - moving and parking the integrated tool carrier between worksites
 - selecting, fitting and testing attachments
 - cleaning and storing attachments
 - coordinating activities with Dogman to ensure correct selection of slings and lifting gear

- coordinating activities with Dogman to ensure load and equipment are secured and stabilised.

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting operations with integrated tool carrier:

- techniques for calculating safe working loads
- safety data sheet and materials handling methods
- safe operating techniques in varying terrain
- identifying and selecting appropriate slings and lifting gear
- securing and stabilising load and equipment
- guiding movement of equipment using approved signals
- geological and technical data (basic)
- equipment processes, technical capability and limitations

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,

- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	AQF** Level	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered to indicate the AQF level.
