Assessment Requirements for RIIMPO307D Conduct wheel grader operations in underground mines

Release: 4

Assessment Requirements for RIIMPO307D Conduct wheel grader operations in underground mines

Modification History

Release	Comment
1	This unit replaces RIIMPO307B Conduct wheel grader operations in underground mines. Performance Criteria amended to make requirements more explicit; manoeuvring, driving and parking up added; operator maintenance element added.
2	Performance Criteria numbering corrected.
3	Performance Evidence adjusted to reflect industry currency; Performance Criteria amended; Amend reference to Licensing requirements in Unit Application.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of wheel grader operations in underground mine, including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
 - reading and understand underground maps
 - applying problem solving and troubleshooting techniques
 - applying techniques to construct drains, layer, level and mark out
 - selecting and using the required tools and equipment
 - working safely around other machines and personnel
- works effectively with others to undertake and complete wheel grader operations in underground mines meeting all of the required outcomes, including:
 - using a range of communication techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
- demonstrates completion of conducting wheel grader operations in underground mines that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - driving and operating a wheeled grader for underground operations
 - adjusting equipment operations to suit site conditions
 - leveling out a minimum of 500 metres of underground road
 - demonstrating the following:
 - constructs drains
 - layer ground
 - unloading supplies in a safe manner
 - steering clear of the wall/rib in confined areas

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting wheel grader operations in underground mines:

- identifying and interpreting ground conditions
- identifying equipment processes, technical capability and limitations
- identifying, interpreting and using basic geological and technical data/maps
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- identifying primary and secondary ventilation
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
