RIIMPO329D Conduct dragline operations

Release: 4

RIIMPO329D Conduct dragline operations

Modification History

Release	Comment
1	This unit replaces RIIMPO329A Conduct dragline operations. Performance Criteria amended to include Manoeuvring, Driving and Parking Up; made requirements more explicit; introduced Housekeeping element.
2	Editorial corrections; Modification History added.
3	Amend reference to Licensing requirements in Unit Application; editorial corrections.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct dragline operations in Coal mining, Extractive and Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Coal mining

Extractive

Elements and Performance Criteria

1. Plan and prepare for dragline operations	1.1	Access, interpret and apply dragline operations documentation and ensure the work activity is compliant
	1.2	Obtain, read, interpret, clarify and confirm work requirements
	1.3	Identify and address risks, hazards and environmental issues

	and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Access, interpret and apply geological and survey data required to complete allocated work 1.6 Select, and check for faults, equipment and/or attachments for work activities 1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency
2. Relocate burden and materials	2.1 Coordination activities with others at the site prior to commencement of, and during the work activity 2.2 Conduct pre-start, start-up, park-up, shutdown and secure equipment procedures 2.3 Drive and operate dragline, and modify the operating technique to meet changing work conditions 2.4 Operate controls to position, fill and dump burden/materials 2.5 Act on or report monitoring systems and alarms 2.6 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.7 Complete work plan within the operating capacity of the equipment
3. Relocate dragline	3.1 Receive and confirm route and location plan and check by site inspection 3.2 Complete ground preparation 3.3 Locate and handle cables 3.4 Coordinate use of support equipment and personnel 3.5 Walk dragline correctly
4. Carry out operator maintenance	4.1 Prepare machine for maintenance 4.2 Conduct inspection and fault finding 4.3 Carry out scheduled maintenance tasks 4.4 Return machine to service 4.5 Process written maintenance records
5. Conduct housekeeping activities	5.1 Clear work area and dispose of or recycle materials 5.2 Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

No equivalent unit

Assessment Requirements for RIIMPO329D Conduct dragline operations

Modification History

Release	Comment
1	This unit replaces RIIMPO329A Conduct dragline operations. Performance Criteria amended to include Manoeuvring, Driving and Parking Up; made requirements more explicit; introduced Housekeeping element.
2	Editorial corrections; Modification History added.
3	Amend reference to Licensing requirements in Unit Application; editorial corrections.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of dragline operations
- works effectively with others to undertake and complete dragline operations that meet all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
 - organising work activities to meet all task requirements
 - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of conducting dragline operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations

- carrying out vehicle refuelling requirements and procedures
- driving and operating the equipment to site conditions
- applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
- applying problem solving and troubleshooting techniques
- selecting and using the required tools and equipment
- safely parking and securing of equipment
- completion of operations to work plan
- relocating burden and materials
- relocating dragline

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting dragline operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying dragline and associated equipment characteristics, technical capabilities and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- complying with project quality requirements
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities
- applying site environmental requirements and constraints related to dragline operations
- reading and interpreting site geological and survey data

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
