RIIMPO333D Conduct underground load haul dump operations

Release: 3

RIIMPO333D Conduct underground load haul dump operations

Modification History

Release	Comment
1	This unit replaces RIIMPO333 Conduct underground load, haul and dump truck operations.
2	Changed “load, haul, dump truck” to “load haul dump”; removed repetition from Performance Criteria; amend terminology used; amend reference to Licensing requirements in Unit Application; editorial corrections.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant’s skills and knowledge required to Conduct underground load haul dump operations in the Metalliferous mining.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Metalliferous mining (Underground)

Elements and Performance Criteria

1. Plan and prepare for underground load haul dump operations	1.1 Access, interpret and apply underground load haul dump operations documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address risks, hazards and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate for work activities 1.5 Select, and check for faults, equipment and/or attachments for
---	---

	work activities 1.6 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency 1.7 Inspect and assess site conditions to determine if scaling is required and take action according to site requirements 1.8 Use approved dust suppression and extraction methods 1.9 Ensure work area is well ventilated before entry 1.10 Identify need for, and apply signage and barricades during each stage of activities
2. Operate load haul dump plant	2.1 Carry out start-up, park, shutdown and secure equipment procedures 2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity 2.3 Drive and operate equipment safely within working environment, load limitations and road conditions 2.4 Monitor and manage equipment performance using appropriate indicators and ensure efficiency of operations 2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment 2.6 Complete the work plan, within the operating capacities of the plant
3. Load material	3.1 Wash down surrounding area and wet material to suppress dust 3.2 Scale down loose material 3.3 Check job site and identify and manages possible misfires in accordance with site procedures 3.4 Check, identify and remove contaminants 3.5 Ensure all hoses and other auxiliary services are neatly stored 3.6 Bog to work plan removing required materials 3.7 Ensure road is kept clear during bogging
4. Haul material	4.1 Confirm type of material and haul to designated location 4.2 Lower bucket in recommended position 4.3 Identify and manage spillages on hauling surface 4.4 Maintain hauling efficiency by managing working environment conditions
5. Dump materials	5.1 Slow equipment to crawl when approaching dump site

	5.2	Lift bucket to appropriate height in readiness for dumping, maintaining stability of loader
	5.3	Dump material evenly distributing load or as required
6. Clean up job site	6.1	Scale down site ensuring loose materials are dislodged safely
	6.2	Leave site and surrounding area clear, safe and accessible
7. Carry out operator maintenance	7.1	Prepare machine for maintenance
	7.2	Conduct inspection and fault finding
	7.3	Carry out scheduled maintenance tasks
	7.4	Process written maintenance records
8. Carry out housekeeping activities	8.1	Clear work area and dispose of or recycle materials
	8.2	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO333D Conduct underground load haul dump operations

Modification History

Release	Comment
1	This unit replaces RIIMPO333 Conduct underground load, haul and dump truck operations.
2	Changed “load, haul, dump truck” to “load haul dump”; removed repetition from Performance Criteria; amend terminology used; amend reference to Licensing requirements in Unit Application; editorial corrections.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate’s competency in this unit. Evidence must be relevant to the roles within this sector’s work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient conducting of load haul dump operations in underground metalliferous mines including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - driving and operating the equipment to site conditions
 - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
 - applying problem solving and troubleshooting techniques
 - selecting and using the required tools and equipment
 - carrying out equipment towing
 - applying vehicle directing procedures
 - applying pushing techniques
- Works effectively with others to undertake and complete load haul dump operations in underground metalliferous mines that meet all of the required outcomes including:

- using a range of communications techniques and equipment to convey information to others
- maintaining written and verbal reporting requirements and procedures
- organising work activities to meet all task requirements
- communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of conducting underground load, haul and dump truck operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - loading material
 - hauling material
 - dumping material
 - scaling down loose material
 - identifying and managing misfires
 - identifying and removing contaminants
 - identifying and managing spillages

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting underground load haul dump operations:

- communicating and performing isolation procedures
- identifying primary and secondary ventilation
- identifying equipment processes, technical capability and limitations
- identifying, interpreting and using geological and technical data (basic)
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,

- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
