RIIOGD302D Trip casing

Release: 2

RIIOGD302D Trip casing

Modification History

Release	Comment
1	This unit replaces RIIOGD302A Trip casing
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to apply trip casing in Drilling.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Drilling

Elements and Performance Criteria

1. Plan and prepare for operations	1.1 Access, interpret and apply trip casing documentation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential risks, hazards and environmental issues and implement control measures 1.4 Select the personal protective equipment appropriate for the work activity 1.5 Identify, locate and apply correct personal protective equipment 1.6 Resolve coordination requirements with others at the site prior to commencing, during and on completion of the work activities and ensure briefings/handover details are read/passed on
------------------------------------	--

	1.7 Confirm availability and status of necessary permits to work in accordance with operational and legislative requirements
	1.8 Confirm availability of necessary third party utilities
2. Prepare to trip casing	2.1 Check grade or grades of casing 2.2 Supervise crew in correctly positioning casing on racks 2.3 Measure and record in writing casing 2.4 Identify joint by the numerical order in which it will be run in the hole and its measured length 2.5 Supervise crew to remove thread protectors, rabbit casing, clean and lubricate threads 2.6 Check casing shoe and hanger joints for damage to threads, sealing surfaces and flapper valves where fitted 2.7 Assemble and check operating conditions of casing running equipment, including slips, tongs, elevators, rubber clamp, protectors and tailing ropes 2.8 Line up pumps to fill casing during running operation
3. Operate derrick during tripping of casing	3.1 Steady casing during stabbing 3.2 Release pick-up elevators 3.3 Correctly align casing for make-up 3.4 Latch side door or slip type elevators 3.5 Relieve casing stabber during casing running operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIOGD302D Trip casing

Modification History

Release	Comment
1	This unit replaces RIIOGD302A Trip casing
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies applicable legislation, documentation, policies and procedures
- works effectively with others to undertake and complete the tripping of casing that meets all of the required outcomes including:
 - supervise and train subordinates to provided standards
 - work as directed by driller timely and efficiently
 - supervise deck crew in correctly positioning casing in pipe bays
 - check grades of casing and supervise deck crew in correctly positioning casing in pipe bays
 - recognise and report equipment malfunction or failure
- demonstrates completion of the tripping of casing that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - remove thread protectors, rabbit casing, clean and lubricate threads
 - measure and record in writing casing in the numerical order in which it will be run into the hole
 - check casing shoe and hanger joints for damage to threads, sealing surfaces and flapper valves where fitted
 - assemble and check operating condition of casing running equipment, including slips, tongs, elevators, rubber clamp, protectors and tailing rope
 - operates derrick correctly during tripping of casing

Knowledge Evidence

The candidate must demonstrate knowledge in trip casing through:

- complying with legislative, site and manufacturer's requirements and procedures
- complying with company and statutory safety guidelines, procedures and practices
- safe operating procedures when operating equipment
- rig maintenance
- types and characteristics of discharges including liquids, gases and solids
- types and characteristics of materials including flammable, toxic, corrosive, explosive and radioactive
- fault finding and reporting requirements and procedures
- dust suppression techniques
- drill system characteristics, technical capability and limitations
- normal drilling operations
- non-routine drilling operations
- man management/rig management

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
