RIIOGD505D Manage drilling induction and orientation

Release: 2

RIIOGD505D Manage drilling induction and orientation

Modification History

Release	Comment
1	This unit replaces RIIOGD505A Manage drilling induction and orientation
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to apply manage drilling induction and orientation in Drilling.

This unit is appropriate for those working in management roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Drilling

Elements and Performance Criteria

1. Plan and prepare to manage drilling induction and orientation	1.1 Access, interpret and apply documentation for managing drilling induction and orientation and ensure the work activity is compliant 1.2 Obtain, read, interpret, clarify and confirm work requirements 1.3 Identify and address potential hazards, risks and environmental issues and implement control measures 1.4 Select and wear personal protective equipment appropriate to the work activity Resolve coordination requirements with others at the site prior to commencing, during and on completion of work activities
2. Examine general safety practices	2.1 Obtain and review policies and procedures in relation to alcohol, drugs and firearms/weapons

	2.2 Develop chain of command and communication strategies 2.3 Put hazard identification, reporting and recording mechanisms in place 2.4 Assess personal protective equipment and procedures and put procedures in place to communicate and monitor adherence 2.5 Identify hazardous materials handling and transport arrangements and establish and communicate procedures to manage and prevent uncontrolled/unauthorised release 2.6 Put hazardous energy control and fire safety procedures in place 2.7 Identify mechanical equipment and manual handling hazard control measures, implement and communicate procedures 2.8 Communicate rig working and living conditions including work rosters and camp rules
3. Communicate first aid/emergency response arrangements	3.1 Identify first aid requirements and communicate to work team 3.2 Identify and highlight dangers associated with the use of first aid applications 3.3 Identify blood borne pathogens and precautions to identify contamination 3.4 Identify different types of alarms and warnings, their uses and authorisations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.
