Assessment Requirements for RIIPBE301D Conduct calcinations activities

Release: 2

Assessment Requirements for RIIPBE301D Conduct calcinations activities

Modification History

Release	Comment
1	This unit replaces RIIPBE301A Conduct calcinations activities
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements requirements, procedures and techniques for the safe, effective and efficient completion of calcinations activities including:
 - adjusting equipment to approved operating parameters to meet product quality targets
 - adding reagents to approved operating parameters
 - carrying out minor maintenance to maintain condition of equipment
 - completing all required documentation clearly, concisely and on time
- works effectively with others to undertake and complete the calcinations activities in a way that meets all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
 - organising work activities to meet all task requirements
 - communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of the conduction of calcinations activities that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - coordinating calcination activity with others
 - adjusting equipment and communicating effects upstream and downstream

- adding reagents
- isolating and shutting down calcination equipment in sequence and perform checks
- performing minor maintenance
- returning calcination equipment to service

Knowledge Evidence

The candidate must demonstrate knowledge of conducting calcinations activities through:

- apply, organisation and site requirements and procedures for conducting calcinations activities including:
 - WHS, site safety and emergency requirements and procedures
 - environmental procedures
 - hazardous goods procedures and consequences of spills and hazardous goods
 - isolation procedures
 - equipment safety requirements
 - operational procedures and checks
 - wet and dry working procedures
 - breakdown procedures
 - diagnosing faults, reporting defects and identifying repair requirements
 - interpreting reports
 - using lift (manual, cranes and loads)
 - accurately maintaining records
 - monitoring operations
 - using hand and power tools
 - contaminant identification
 - calcining process
 - pumping system and flow charts (pipeline and sprinkler systems)
 - reagent types
 - sampling
- monitor equipment limitations and operating parameters
- interpreting metallurgical and technical data (basic)
- identifying types of ores

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,

- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
