Assessment Requirements for RIIRAI504D Select and install surface plant and equipment

Release: 2

Assessment Requirements for RIIRAI504D Select and install surface plant and equipment

Modification History

Release	Comment
1	This unit replaces RIIRAI504A Select and install surface plant and equipment
2	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant legislation, documentation, policies and procedures
- implements procedures and techniques for the safe, effective and efficient selection and installation of surface plant and equipment including:
 - identifying and addressing training needs
 - implementing hazard identification and risks assessment processes
 - managing work planning and coordination activities
 - accessing, interpreting and applying procedures for
 - drafting and interpretation of specifications/interpret tender documents
 - drafting and interpretation of contract management documents
 - managing purchasing
 - capital expenditure applications preparation
 - contract management
 - assessing of operating capacity
 - assessing of the compatibility of items of plant and equipment
 - determining ownership cost
 - determining operating cost targets
 - determining product support requirements
 - identifying market considerations
 - identifying operational considerations

- works with others to undertake and complete the selection and installation surface plant and equipment including:
 - providing team leadership
 - managing people and processes
 - resolving conflict
 - coordinating human, financial and physical resources
 - developing, initiating and administering work plans
 - interpret and apply operational performance data
 - engaging internal and external stakeholders
- demonstrates completion of the selection and installation of surface plant and equipment that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - identification of the relevant information and scope of the work
 - identifying the full range of specification requirements including parameters for selection and installation of plant and/or equipment
 - identifying all aspects of the site surface plant and equipment
 - managing the installation of plant and/or equipment
 - managing the commission of plant and/or equipment
 - managing the review and reporting processes of plant and/or equipment acquisition
 - managing the installation and commissioning processes
 - gathering, validating and assessing the data on the various options
 - assessing options, in consultation, that meet the identification and selection parameters

Knowledge Evidence

The candidate must demonstrate knowledge in selecting and installing surface plant and equipment through:

- legislative, organisation and site requirements and procedures for;
 - risk management
 - statutory compliance
 - development approval, mining licences (or equivalent)
 - work, health and safety
 - environmental management
 - quality requirements
 - purchasing capital expenditure
 - contract management
 - administration requirements (including records and reports)
- plant and equipment characteristics, capabilities and limitation
- specification requirements
- contract requirements

- operating cost record and analysis procedures
- product support requirements
- market information
- operational requirements
- approved suppliers procedure

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.
---------------	--

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level
